INDEPENDENT AUDITOR'S REPORT

Board of Directors
Dexter Area Fire Department
Dexter, Michigan

We have audited the accompanying financial statements of the governmental activities and each major fund of Dexter Area Fire Department, as of and for the year ended December 31, 2006, which collectively comprise the Department's basic financial statements as listed in the table of contents. These financial statements are the responsibility of Dexter Area Fire Department's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with United States generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of Dexter Area Fire Department as of December 31, 2006, and the respective changes in financial position, thereof for the year then ended in conformity with United States generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we have also issued our report dated March 1, 2007, on our consideration of Dexter Area Fire Department's internal control over financial reporting and our tests of its compliance with certain provision of laws, regulations, contracts and grants.

The administration's discussion and analysis and budgetary comparison information on pages 3 through 8 and page 22 are not a required part of the basic financial statements but is supplemental information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplemental information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Dexter Area Fire Department's basic financial statements. The accompanying other supplemental information, as identified in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the general purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the general purpose financial statements taken as a whole.

Management's Discussion and Analysis

This section of Dexter Area Fire Department's annual financial report presents our discussion and analysis of the Department's financial performance during the fiscal year ended December 31, 2006. It is best read in conjunction with the Department's financial statements that follow this section.

Using This Annual Report

This annual report consists of a series of financial statements and notes to those statements. These statements are organized so the reader can understand Dexter Area Fire Department financially as a whole. The *Government-Wide Financial Statements* provide information about the activities of the entire Department, presenting both an aggregate view of the Department's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short-term as well as what remains for future spending. The fund financial statements look at the Department's operations in more detail than the government-wide financial statements by providing information about the Department's most significant fund - the General Fund - with all other funds presented in one column as non-major funds.

Reporting The Department As A Whole - Government-Wide Financial Statements

One of the most important questions asked about the Department is, "As a whole, what is the Department's financial condition as a result of the year's activities?" The statement of net assets and the statement of activities, which appear first in the Department's financial statements, report information on the Department as a whole and its activities in a way that helps you answer this question. These statements are prepared to include all assets and liabilities, using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These two statements report the Department's net assets - the difference between assets and liabilities, as reported in the statement of net assets - as one way to measure the Department's financial health or financial position. Over time, increases or decreases in the Department's net assets - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenues and expenses is the Department's operating results. However, the Department's goal is to provide services to residents, not to generate profits as commercial entities do. One must consider many other non-financial factors to assess the overall health of the Department.

The statement of net assets and statement of activities report the governmental activities for the Department, which encompass all of the Department's services, including resources and community enrichment. Revenue from other governments finance most of these activities.

Reporting The Department's Most Significant Funds - Fund Financial Statements

The Department's fund financial statements provide detailed information about the most significant funds - not the Department as a whole. Some funds are required to be established by State law and by bond covenants. However, the Department establishes funds as needed to help it control and manage money for particular purposes or to show that it's meeting legal responsibilities for using certain taxes, grants, and other money. The governmental funds of the Department use the following accounting approach:

Governmental Funds - All of the Department's services are reported in governmental funds. Governmental fund reporting focuses on showing money inflows and outflow and the balances remaining at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the Department and the services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the Department's programs. The relationship (or differences) between governmental activities (reported in the statement of net assets and the statement of activities) and governmental funds is described in a reconciliation.

Management's Discussion and Analysis

The Department As A Whole

Recall that the statement of net assets provides the perspective of the Department as a whole. Table 1 provides a summary of the Department's net assets as of December 31, 2006 and 2005:

TABLE 1	Governmental Activities (In Thousands)	
	2006	2005
ASSETS		
Current and other assets	\$ 266.8	\$ 321.9
Capital assets - Net of accumulated depreciation	1,145.6	718.6

Long-term liabilities	608.2	266.6
TOTAL LIABILITIES	769.2	410.2

Restricted	0.0	0.0
Unrestricted	110.1	165.4
TOTAL NET ASSETS	\$ 643.2	\$ 630.3

The above analysis focuses on the net assets (see Table 1). The change in net assets (see Table 2) of the Department's governmental activities is discussed below. The Department's net assets were \$643.2 thousand at December 31, 2006. Capital assets, net of related debt totaling \$533.1 thousand compares the original cost, less depreciation of the Department's capital assets to long-term debt, including accrued interest on capital appreciation bonds, used to finance the acquisition of those assets. Restricted net assets are reported separately to show legal constraints from debt covenants and enabling legislation that limit the Department's ability to use those net assets for day-to-day operations. The remaining amount of net assets (\$110.1 thousand) was unrestricted.

The \$110.1 thousand in unrestricted net assets of governmental activities represents the *accumulated* results of all past years' operations. The operating results of the General Fund will have a significant impact on the change in unrestricted net assets from year to year.

The results of this year's operations for the Department as a whole are reported in the statement of activities (see Table 2), which shows the changes in net assets for fiscal years 2006 and 2005.

DEXTER AREA FIRE DEPARTMENT

Management's Discussion and Analysis

As reported in the statement of activities, the cost of all of our governmental activities this year was \$884.4 thousand. Certain activities were partially funded from those who benefited from the programs (\$893.8 thousand) or by other governments and organizations that subsidized certain programs with grants and categoricals (\$0.0 thousand). The remaining "public benefit" portion of our governmental activities was paid with other revenues, such as interest and general entitlements.

The Department experienced an increase in net assets of \$12.9 thousand. The key reason for the change in net assets was capitalizable expenditures. The increase in net assets differs from the change in fund balance and a reconciliation appears on page 13.

As discussed above, the net cost shows the financial burden that was placed on the State and the Department's taxpayers by each of these functions. Since charges for services constitute the vast majority of the Department's operating revenue sources, the Board of Directors must annually evaluate the needs of the Department and balance those needs with available unrestricted resources.

The Department's Funds

As we noted earlier, the Department uses funds to help it control and manage money for certain purposes. Looking at funds helps the reader consider whether the Department is being accountable for the resources taxpayers and others provide to it and may provide more insight into the Department's overall financial health.

As the Department completed this year, the governmental funds reported a combined fund balance of \$202.3 thousand, which is a decrease of \$82.6 thousand from last year. The primary reason for the decrease is capital outlay expenditures. The General Fund, the principal operating fund, saw the fund balance decrease \$82,619 to \$202,279, which is better than the budgeted decrease of \$137,100.

General Fund Budgetary Highlights

Over the course of the year, the Department amends its budget as it attempts to deal with changes in revenues and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. A schedule showing the Department's original and final budget amounts compared with amounts actually paid and received is provided in required supplemental information of these financial statements.

Capital Asset And Debt Administration

Capital Asset

At December 31, 2006, the Department had \$1,145.6 thousand invested in capital assets that include vehicles and equipment. This amount represents a net increase (including additions and disposals) of approximately \$427,063 or 59 percent over last year.

Net Capital Assets	<u>\$ 1,145,637</u>	<u>\$ 718,574</u>

Other obligations include employee-compensated absences. We present more detailed information about our long-term liabilities in the notes to the financial statements.

Economic Factors And Next Year's Budgets And Rates

Our elected officials and administration considered many factors when setting the Department's 2007 fiscal year budget.

The Department's budget is very similar to the prior year. Personnel costs will increase, and governmental revenues will be increased to compensate. Revenues and expenditures will be very consistent with last year.

Contacting The Department's Financial Management

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Department conform to United States generally accepted accounting principles as applicable to governmental units. The following is a summary of the significant accounting policies.

A. REPORTING ENTITY

The Dexter Area Fire Department provides fire protection and rescue services to the Village of Dexter and the Townships of Webster, Dexter, and Lima, of Washtenaw County, Michigan operating under an intergovernmental service agreement. The Department is directed by a Board consisting of representatives from each of the participating governmental entities.

B. BASIS OF PRESENTATION**Government-Wide and Fund Financial Statements**

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenue includes (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes, intergovernmental payments, and other items not properly included among program revenues are reported instead as general revenue.

Government-Wide Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants, categorical aid and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

As a general rule, the effect of inter-fund activity has been eliminated from the government-wide financial statements.

B. BASIS OF PRESENTATION (CONTINUED)

Fund Financial Statements

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenue is recognized as soon as it is both measurable and available. Revenue is considered to be available if it is collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and severance pay, are recorded only when payment is due.

Property taxes, unrestricted state aid, intergovernmental grants and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenue of the current fiscal period. All other revenue items are considered to be available only when cash is received by the government.

GOVERNMENTAL FUND

General Fund - The General Fund is the general operating fund of the Department. It is used to account for all financial resources except those required to be accounted for in another fund.

C. BUDGETS AND BUDGETARY ACCOUNTING

The General Fund is under formal budgetary control. Budgets are adopted on the modified accrual basis of accounting. Amendments are by action of the Board.

P.A. 621 of 1978, Section 18 (1), as amended, provides that a local unit shall not incur expenditures in excess of the amount appropriated.

In the body of the financial statements, the Department's actual expenditures and budgeted expenditures for the budgetary funds have been shown on a functional basis. The approved budgets of the Department for these budgetary funds were adopted at the functional level.

D. CASH EQUIVALENTS

The Department considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

E. FINANCIAL INSTRUMENTS

The Department does not require collateral to support financial instruments subject to credit risk.

F. FUND EQUITY

Reservations of fund balance represent these portions of fund equity not appropriable for expenditure or legally segregated for a specific future use.

G. CAPITAL ASSETS

Capital assets, which include equipment and vehicles are reported in the applicable governmental column in the government-wide financial statements. The government defines capital assets as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of 1 year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. Costs of normal repair and maintenance that do not add to the value materially extended asset life are not capitalized.

Equipment, and vehicles are depreciated using the straight-line method over the following useful lives:

Vehicles	5-20 years
Equipment	5-10 years

H. LONG-TERM OBLIGATIONS

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period.

Premiums received on debt issuances are reported as other financing sources while discounts are reported as other financing uses. Issuance costs are reported as debt service expenditures.

I. TOTAL COLUMNS ON COMBINED STATEMENTS

Total columns on the Combined Statements are captioned (Memo Only) to indicate that they are presented only to facilitate financial analysis. Data in these columns do not present financial position or results of operations in conformity with United States generally accepted accounting principles. Neither is such data comparable to a consolidation. Inter-fund eliminations have not been made in the aggregation of this data.

J. ESTIMATES

The preparation of financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

NOTE 2 - DEPOSITS WITH FINANCIAL INSTITUTIONS

A. LEGAL OR CONTRACTUAL PROVISIONS FOR DEPOSITS AND INVESTMENTS

The Michigan Political Subdivisions Act No. 20, Public Acts of 1943, as amended by Act No. 217, Public Acts of 1982, states the Department, by resolution, may authorize investment of surplus funds as follows:

1. In bonds and other direct obligations of the United States or an agency or instrumentality of the United States.
2. In certificates of deposit, savings accounts, or depository receipts of a bank, which is a member of the Federal Deposit Insurance Corporation; or a savings and loan association, which a member of the Federal Savings and Loan Insurance Corporation; or a credit union, which is insured by the National Credit Union Association; but only if the bank, savings and loan association, or credit union complies with Subsection (2).
3. In commercial paper rated at the time of purchase within the 2 highest classifications established by not less than 2 standard rating services and which matures not more than 270 days after the date of purchase. Not more than 50% of any fund may be invested in commercial paper at any time.
4. In United States government or Federal agency obligation repurchase agreements.
5. In bankers' acceptances of United States banks.
6. In mutual funds composed of investment vehicles that are legal for direct investment by local units of government in Michigan.

The Department is in compliance with State law regarding their cash deposits.

The Department maintains its cash deposits at one bank.

The Governmental Accounting Standards Board Statement No. 3 risk disclosures for the Department's cash deposits are as follows:

<u>Deposits</u>	<u>Book Value</u>	<u>Carrying Amounts</u>
Insured (FDIC)	\$ 100,000	\$ 100,000
Uninsured & Uncollateralized	143,282	148,758
Total Deposits	<u>\$ 243,282</u>	<u>\$ 248,758</u>

The differences between the book value and the bank carrying amounts are caused by deposits in transit and outstanding checks.

NOTE 3 - ACCUMULATED FUND DEFICITS

There were no accumulated fund deficits at December 31, 2006.

NOTE 4 - CAPITAL ASSETS

Capital asset activity of the Department's Governmental activities was as follows:

	<u>Balance January 1, 2006</u>	<u>Additions</u>	<u>Disposals and Adjustments</u>	<u>Balance December 31, 2006</u>
Capital assets being depreciated:				
Vehicles	\$ 1,079,568	\$ 505,958	\$ ---	\$ 1,585,526
Equipment	179,328	20,000	---	199,328
Subtotal	<u>1,258,896</u>	<u>525,958</u>	<u>---</u>	<u>1,784,854</u>
Accumulated depreciation:				
Vehicles	448,767	84,795	---	533,562
Equipment	91,555	14,100	---	105,655
Subtotal	<u>540,322</u>	<u>98,895</u>	<u>---</u>	<u>639,217</u>
Net capital assets	<u>\$ 718,574</u>	<u>\$ 427,063</u>	<u>\$ ---</u>	<u>\$ 1,145,637</u>

Depreciation expense was not charged to activities as the Department considers its assets to impact multiple activities and allocation is not practical.

**REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER FINANCIAL
REPORTING BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

Board of Directors
Dexter Area Fire Department

We have audited the financial statements of Dexter Area Fire Department as of and for the year ended December 31, 2006, and have issued our report thereon dated March 1, 2007. We conducted our audit in accordance with United States generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether Dexter Area Fire Department's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Dexter Area Fire Department's control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the general purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the general purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the Board of Directors, management and the State of Michigan. However, this report is a matter of public record and its distribution is not limited.

To the Board of Directors of
Dexter Area Fire Department

I have recently completed the audit of the financial statements of Dexter Area Fire Department for the year ended December 31, 2006, and would like to take this opportunity to make the following comments and recommendations.

Financial Overview

The Department finished the year with total fund balance of \$202,279. This is a decrease of \$82,619 from the prior year level. The primary reason for the decrease was the purchase of a new truck for approximately \$525,000. This was paid for using new borrowings of approximately \$447,000 and other available funds. The new borrowings were combined with 3 refinanced payments on the 2001 truck and call for 7 years of payments of \$101,338.

The Department continues to be in strong financial position. The Department should create a schedule of planned capital purchases to determine what amounts should be set aside year-by-year to make future purchases without the expense of borrowing. Currently interest rates are low, but this may not be the case in future years.

Thank you for the opportunity to continue to work with your Department. If you have questions regarding any of this information, please contact my office.

Sincerely,

Karl L. Drake, CPA
